

The Greenville Public Library has a new collection --
PLAYAWAYS.

Playaway is the pre-loaded audiobook that gives patrons the portability and freedom to listen to audiobooks anytime, anywhere.

Playaway's universal audio jack is compatible with headphones and auxiliary cords. As technology continues to change, Playaway is and will remain the only physical audiobook format.

Audiobooks help children with the process of identifying words by modeling fluent reading and expanding vocabulary and help motivate new or struggling readers by giving them a taste of how fun reading can be.

Greenville Public Library's Playaway collection was funded by an Illinois State Library Back to Books Grant. We purchased a total of 55 juvenile and young adult titles for our patrons to enjoy. If needed, earbuds may be purchased for 50 cents.
